Personal Statement: It is an honor to be an MPS candidate, this time to serve on the Nominating Committee. This organization is one of the strongest, largest, and most distinguished APA District Branches in the U.S., a leader in advocacy for psychiatry in Massachusetts and nationally. Many APA leaders of the APA began in the MPS. I have been privileged to serve on many MPS and APA components. As a Nominating Committee member I will continue to encourage strong candidates committed to advocacy, contested elections (at least 2 candidates), and that residents and early career psychiatrists lend expertise and energy to the MPS's efforts on behalf of our profession.
