**Personal Statement:**

Fellow members, I am honored to be nominated to continue serving on the Nominating Committee. Knowing that the MPS represents our interests at the regulatory and legislative table is critical and I want to continue to be a part of this.

Meeting other MPS members meetings has been energizing and carries over when facing the challenges before us all here in the Commonwealth.

I urge you all to vote in this year's election. As an APA Area 1 Rep. I pledge to continue forwarding the Society's causes and those of our patients at every opportunity.
